

Kenny F. Hector

Suffern, NY 10901 | 845-659-6405 | kennyhector24@gmail.com | github.com/khector24

Summary

Software Engineer experienced in building full-stack web applications, REST APIs, and data-driven platforms using React, Node.js, Express, Java, and AWS. Skilled in designing scalable backend services, processing public datasets, and developing responsive applications that improve business operations and user experience.

Technical Skills

Languages: Java, JavaScript (ES6+), SQL, HTML, CSS

Frameworks: React, Express, Node.js, Material UI, JavaFX

Databases: MySQL, DynamoDB, MongoDB, SQLite

Tools: Git, GitHub, Postman, IntelliJ, VS Code, Maven

Certification: AWS Certified Solutions Architect – Associate (May 2024 – May 2027)

Experience

Splash Zone Aquatics Website – <https://splashzoneaquatics.com/>

Sep 24 - May 25

Full-Stack Developer | React, Material UI, AWS

Contract/Remote

- Designed, developed, and deployed a production website for a swim school using React, Material UI, and AWS.
- Boosted company visibility, contributing to ~50% of seasonal registrations before summer launch.
- Integrated AWS Lambda, DynamoDB, and the Resend API to automate email workflows with secure one-click unsubscribe functionality.

Rainbow Ace Hardware

Apr 16 – Jul 24

Assistant Manager/Technical Analyst

Suffern, NY

- Led and supervised 25+ staff, improving daily operations and communication across departments.
- Built an in-house delivery tracking system, reducing order errors and streamlining logistics.
- Enhanced POS system with an image/code module, cutting checkout time by 47%.

Projects

RegionLore | React, Express, Node.js, AWS, Census, ACS, IRS Migration

<https://regionlore.com/>

- Built a full-stack analytics platform for exploring U.S. population, migration, education, housing, transportation, and economic trends across all 50 states and the 100 largest metropolitan areas.
- Designed ETL pipelines that transformed Census, ACS, IRS migration, and NAEP datasets into optimized REST APIs and application-ready datasets.
- Developed Express REST APIs and interactive React dashboards with geographic visualizations, search, filtering, and state/metro comparisons; deployed the platform on AWS using S3, CloudFront, Route 53, and ACM.

Delivery Scheduler | React, Node.js, Express, DynamoDB

- Developed a full-stack delivery platform for real-time tracking, updates, and driver management.
- Automated customer alerts, reducing delivery errors and missed notifications to near-zero.

Theft Tracker Application | React, Material UI, AWS S3, Lambda, DynamoDB

- Built a theft reporting platform with dynamic forms and file uploads via pre-signed S3 URLs.
- Resulted in 33% faster police reporting and improved suspect recognition using archived reports.

Portfolio Website | React, AWS S3, Route 53, CloudFront

<https://kennyhector.com/>

- Built and deployed a responsive portfolio website showcasing projects and technical skills.

Education

University of Colorado Boulder | Boulder, CO

Expected Mar. 2027

M.S. Computer Science, GPA: 4.0

St. Thomas Aquinas College | Sparkill, NY

B.S. Computer Science
